Opening Up New Realms of Cutting-Edge Truck Crane Technology

State-of-the-Art Truck Cranes Crafted in Japan

GT-750EL

Crane capacity: 75,000 kg 5-section long boom: 47.0 m 2-staged jib: 9.0 m/14.3 m

Maximum lifting height: 47.3 m (Boom)

61.2 m (Jib)

Maximum load radius: 40.0 m (Boom)

48.0 m (Jib)

GT-600EL

Crane capacity: 60,000 kg 5-section long boom: 43.0 m 2-staged jib: 9.0 m/14.3 m

Maximum lifting height: 43.4 m (Boom)

57.3 m (Jib)

Maximum load radius: 34.0 m (Boom)

44.0 m (Jib)

GT-300EL

4-section long boom: 34.0 m
2-staged jib: 8.5 m/14.0 m

Maximum lifting height: 34.0 m (Boom)

48.0 m (Jib)

Maximum load radius: 32.0 m (Boom) 40.0 m (Jib)

The GT-750EL/600EL/300EL redefines what truck cranes should be by offering enhanced safety and performance in all crane operations. The newly designed carrier also boasts refined performance, enabling it to withstand even the harshest running test conditions.

Tadano has utilized years of development experience to craft this cutting-edge, Japanese-manufactured truck crane.

Overall length: approx. 12,620 mm Overall width: approx. 2,550 mm Overall height: approx. 3,800 mm Max. traveling speed: 85 km/h

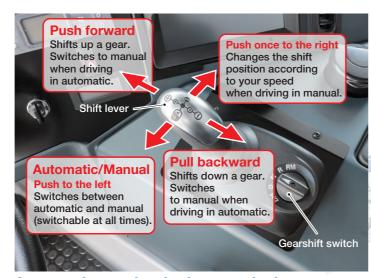

Photo: Optional model

The carrier has been newly designed, right down to the suspension, to pass long and rigorous road tests in a variety of environments and substantially improve crane mobility. The cabin has also been remodeled with features that contribute to comfortable and safe driving, such as automatic mechanical transmission.

Two-person, full-width cabin

The full-sized cabin accommodates two passengers, allows comfortable traveling for the operator.

Automatic mechanical transmission

High performance engine [EUROⅢ]

Daimler OM457LA *GT-750EL, GT-600EL 4-cycle, turbo charged and

after cooled

Max. output: 260 kW {353 PS} Max. torque: 1,850 Nm {188 kgf-m} Daimler OM926LA *GT-300EL

4-cycle, turbo charged and after cooled

Max. output: 240 kW {326 PS}

Max. output: 240 kW {326 PS}
Max. torque: 1,300 Nm {132 kgf-m}

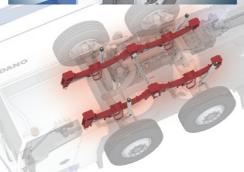

Front:

Reyco leaf-type suspensions *GT-750EL, GT-600EL

Sachs shock absorbors

Improved ride comfort and operability.

Cruise control

A system that automatically controls the speed of the carrier

New suspensions for the carrier

The ride quality has been optimized to ensure the driver's comfort and protect the carrier.

Grane

The rounded boom is made of high tensile steel which decreases its weight while increasing its strength to realize smooth and powerful crane operation, while the high-performance AML-C assists with safe and comfortable operation. In addition, the newly developed Smart Chart expands workability

into whole new areas to improve operation efficiency. **GT-750EL GT-600EL** Crane capacity: 75,000 kg Crane capacity: 60,000 kg 5-section long boom: 47.0 m 5-section long boom: 43.0 m 2-staged jib: 9.0 m/14.3 m 2-staged jib: 9.0 m/14.3 m Maximum lifting height: 47.3 m (Boom) Maximum lifting height: 43.4 m (Boom) 61.2 m (Jib) 57.3 m (Jib) Maximum load radius: 40.0 m (Boom) Maximum load radius: 34.0 m (Boom) 48.0 m (Jib) 44.0 m (Jib)

Rounded construction boom

The rounded boom constructed of high tensile steel contributes to decreased boom weight and increased boom strength.

GT-300EL

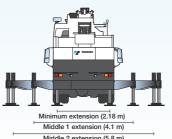

Crane capacity: 30,000 kg 4-section long boom: 34.0 m

2-staged jib: 8.5 m/14.0 m

Maximum lifting height: 34.0 m (Boom)

48.0 m (Jib)

Maximum load radius: 32.0 m (Boom) 40.0 m (Jib)

Two telescoping modes [I] & [II] *GT-750EL, GT-600EL

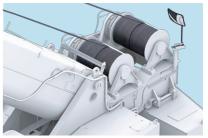

The operator can select either of the two boom telescoping modes based on the designated job plan. This provides enhanced crane capabilities in accordance with work needs.

Mode [Ⅱ]

Mode [I] Mode [I] is extension of 2nd section only. Then synchronized extension of 3rd, 4th and 5th sections.

Mode [Ⅱ] is synchronized extension of 3rd, 4th and 5th sections. Then 2nd section independently.

Two winches with cable follower

Both the main winch and the auxiliary winch have powerful line pull (GT-750EL: 5.6-ton, GT-600EL/300EL: 4.5-ton) and operate at high speeds for increased work efficiency.

Operator Comfort

The crane cabin provides improved livability and offers the operator a comfortable working environment.

The crane operating levers are of finger control type and surely and steadily respond to the operator.

Automatic moment limiter [AML-C]

Tadano's new AML-C is easy to use. It allows the operator to simultaneously monitor: boom angle, boom length, operating pressure of the elevating cylinder, the extension width of outriggers, slewing position, rated lifting capacity and present hook load. All of this enables the AML-C to move easily through lifting capacity changes without changing configurations and codes to make a lift. The AML-C provides both audio and visual warnings when a condition exists that will overload the crane and automatically employs our slow stop function to avoid shock loads.

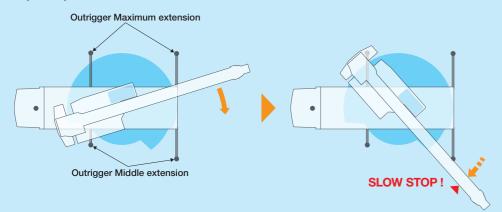

The AML-C with "OPERATOR" pre-set working range limits and automatic slow stop functions will assist the operator to deliver safe smooth operations.

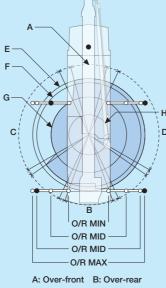

Control of asymmetric extension width of outriggers

When operating the crane with the asymmetric outriggers extended, the AML-C detects the extension width of all of the crane's outriggers (front, rear, left and right) to measure maximum work capacity in each area.

When slewing the boom from the longer outrigger area to the shorter outrigger area, the AML-C detects the motion and displays the maximum capacity according to the extension width of each of the outriggers, and brings the motion to a slow stop before it reaches the maximum capacity.

Regardless of operator awareness, the AML-C's slow stop function will help to minimize any safety risk.

F: Rated Load [O/R MID]

G: Rated Load [O/R MID]

H: Rated Load [O/R MIN]

HELLO-NET

The HELLO-NET System is used to monitor crane activity straight from your computer or mobile device.

You have the ability to view work history, machine position data and maintenance information.

HELLO-NET provides advanced customer support between the owners' site and TADANO Group.

Note: HELLO-NET availability varies by situation. For detail, please contact your distributor or our sales staff in charge.

Reduce fuel consumption

Positive Control System

The system effectively controls the quantity of hydraulic pump discharge at the time of crane operation in response to the amount of movement applied by the operating lever.

Eco Mode System

The system controls the maximum engine speed during crane operation.

Fuel consumption CO₂ emissions [Compared with GT-600EX]

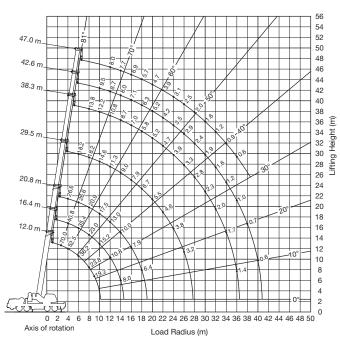

GT-750EL

* The above figures differ according to the type of a crane used and its operating conditions.

GT-750EL

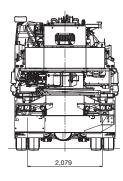

WORKING RANGE

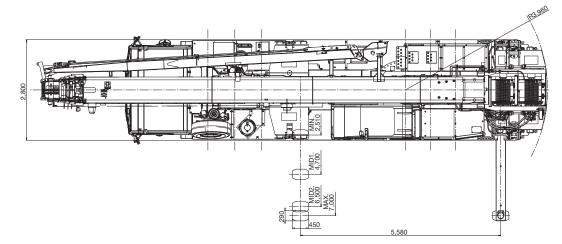

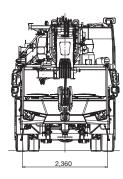

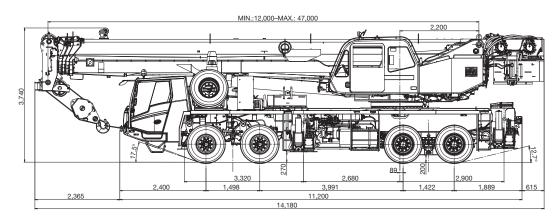

Continuing technical development requires Tadano to retain the right to make specifications, equipment and price changes without notice.

DIMENSIONS

*Some specifications are subject to change

COUNTERWEIGHT GT-750EL: Mass... 7.7 t

Fixed counterweight: Mass... 4.0 t

Self-Removable counterweight: Mass... 1.0 t

Self-Removable counterweight: Mass... 2.7 t

Self-Removable counterweight

Counterweight is hydraulically mounting/dismounting; in addition, dismounted counterweights can be lifted and moved for transport without a helper crane, as well as being re-mounted at a work site for operation.

OPTIONAL ITEMS

Wind speed indicator

Winch drum camera and monitor

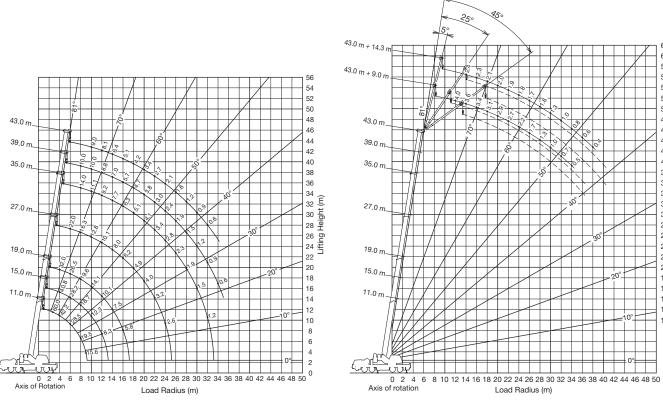

Rear view camera (monitor: standard)

• ABS • Spark arrester(Euro3) • 400 L fuel tank • Rear fog lamp • Spare tire and bracket • Stepladder(capacity 100 kg)
